

PARTICIPATION IN URBAN CLIMATE PROTECTION

3rd December 2010 - International workshop

Public participation is a crucial part of the implementation and realization of municipal climate protection. What are the key issues for increasing the successful participation of local actors in the drawing and implementation of local climate policy? How can civil society best be enabled to engage in the development of locally adapted solutions? The aim of the workshop is to discuss a variety of already existing approaches for climate activities in European cities and municipalities in order to exchange best-practices and experiences with models of participation within a European context.

Place: Centrum Konferencyjne Zielna
Fundacja Współpracy Polsko-Niemieckiej
ul. Zielna 37, 00-108 Warszawa
